

Steroid Receptors: Molecular Biology, Physiology, and Pharmacology

Call for Papers

Nuclear Receptor Research is organizing a thematic issue focused on steroid receptors. In addition to a collection of reviews which have been secured for this issue, the editors would like to invite researchers working in the field to contribute to this thematic issue original research articles.

Suggested topics include, but are not limited to:

- Molecular mechanistic actions of steroid receptors.
- Steroid receptor architecture rearrangements.
- Biological regulations of steroid receptor transcriptional activity.
- Steroid receptor actions in physiology and disease.
- Pharmacological manipulations of steroid receptors.

Before submission, authors should carefully read over the journal's Author Guidelines, which are located at:

<http://www.agialpress.com/journals/nrr/author-guidelines/>. Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Management System at: <http://mms.agialpress.com/submit/journals/nrr/> according to the following timetable:

Manuscript Due	September 1, 2015
First Round of Reviews	December 1, 2015
Publication Date	March 1, 2016

Lead Guest Editor

Mario D. Galigniana, IBYME/Conicet & Universidad de Buenos Aires, Argentina; mgali@qb.fcen.uba.ar

Guest Editors

Jan-Åke Gustafsson, University of Houston, USA; jgustafs@central.uh.edu

John A. Cidlowski, National Institute of Environmental Health Sciences, USA; cidlows1@niehs.nih.gov

Brian Rowan, Tulane University, USA; browan@tulane.edu
