

## Research into/on Diseases and pharmacognosy and natural medicine and medical science

Reza Rezaie Khanghah

Shahid rajaee teacher training university, Iran

### Abstract:

#### Introduction:

First of all I found lots of medicine for lots of diseases like phlegm and sore throat and headache and etc. I stated a Therapy for scrupulous and other kind of disease like this. Except disease and medical science and medicine and astronomy I have some other research into/on other fields of study. I found how stars moves at constellation and they have two general movements and in conclusion I say some of my studies here you drink water at stand up stance it can cause you sweat a lot. My findings support my hypothesis. My hypothesis is can we have natural medicine instead of chemicals one? Does any disease have medicine? Most scrutinized literature was collected from different sources including PubMed. This database has been curretted using published methods for all most all pharmaceuticals. Required information for regular method development/validation such as IUPAC name, structure, solubility, chromatographic conditions, instrumentation information like HPLC, LCMS detection parameters, sample preparations, recovery details, limit of detection and limit of quantification,  $T_{max}$ ,  $C_{max}$  etc., for routine application in BA/BE studies of pharmaceuticals was incorporated including official pharmacopeias information such as European Pharmacopeia, Japan Pharmacopeia and US Pharmacopeia. Database includes drug based bioanalytical methods covering most required fields and external database links of important drug portals such as drug bank, Rxlist, MEDLINE plus, KEGG Drug ID, KEGG Compound ID, Merck manual, PubChem compound ID, PubChem substance ID and USFDA. I use lots of studies and conducted my studies with lots of references that I said it at the end of my manuscript.

My hypothesis is can we have natural medicine instead of chemicals one? Does any disease have medicine? Can we success at our life? And other hypothesis that I explain it in manuscript. I found lots of medicine that we can use it instead of chemicals one and have good research about scrupulous disease and I found some cures for specific diseases and I reached a point that it's about remedies that we can use it for our illness instead of some chemicals medicine. Instead of medicine and medical science I found the exact bones of our body (anatomy) and except these I say some information about other fields of study and said it in my manuscript. I hope this information help people and I think that this information is necessary for general health and it is important for all patients and people and these information will be help medical experts and other doctors and other fields of study like astronomy and pharmacognosy and help other kind of study that their research rely on my manuscript. Everybody finds sorrow in his/herself and doesn't know the reason of that wash

his/her head. Eat grape because it destroys sorrow from you. Eat basil because it digests your food and reveals pain and opens vessels and increases your appetite. If a person doesn't eat one dinner, one vessel in his/her body will die and never be alive. Put on shoes because it increases your eyesight. Row hair, destroy pain and with that we don't need any medicine. Until your body can tolerate the pain avoid from medicine (don't eat medicine) and then when your body can't tolerate from pain eat medicine. with your pain until you can tolerate that, tolerate. Drinking medicine without illness although a person can survive but it cause unpleasantness. For friendship between couples read 1001 a blessed name (دودو لا) (on currant (raisin) or food(meal) of couples until both of them eat from that and it cause friendship between them if God wants. Drinking honey cause your body growth. Wash legs with cold water after take shower safes you from headache. When we exit from bathroom not only in summer but also in winter we use cover for our head because of prevention of headache.

The first thing that God created was water and from that everything appeared. Everybody brushes twice everyday, his/ her toothache will be disappeared and his/her memory will be increased and his/her teeth will be cleaned. Eating wild animals meat and beef meat a lot can cause imbecile and forgetfulness. Eating fish and egg with each other can cause toothache and colic (gripe). If someone massages a dead, and dead becomes alive I don't deny that. God prohibits we because if a person drinks wine he/she will kill someone or says sth to god for example tell a lie that God for example has this or that feature that God doesn't have that and do some job like crime and thuggery. There is a meat in human body that if it is healthy and works properly the rest organs or other parts of body becomes healthy and works properly but if it isn't the rest organs or other parts of body can't work properly and becomes healthy and that meat is heart. If you want to run away from gravity of black hole you should run away at a speed of 1 billion and 80 million Km. Stars are saving us not to sink at space. Everybody wants his/her bladder not to get disease doesn't keep his/her urination.

Lengthen your mealtime because the moment of that doesn't include your lifetime. Eat your food when you have an appetite and don't eat food when your appetite remains. E). everybody finds sorrow in his/herself and doesn't know the reason of that wash his/her head. Eat grape because it destroys sorrow from you. Eat basil because it digests your food and reveals pain and opens vessels and increases your appetite. If a person doesn't eat one dinner, one vessel in his/her body will die and never be alive.

Put on shoes because it increases your eyesight. s. Brushing teeth a lot although it can shine teeth but instead makes the root of teeth weak. Melon melts bladder stone. If a person used to eat egg every day he/she will have freckles. Eat quince because it increases your mentality and destroys opacity(obscurity) in eyes. If someone eats melon before food his/her stomach will be washed. For curing fever, use 210 grams sugar and dissolve that in cold water and drink that when you are hungry. Put on soft cloth and take shower a lot cause you get fat and eat egg a lot cause you will be thin. Eat less amount of fish because fish melts body. Comb hair takes away phlegm. Matrimony (marriage) struggle can lead to heart illness. Research shows that couples that suffer from marriage struggle 34% more than other people cause heart illness, if you write this subject in the Internet maybe the information you see are a lot but I explain this in one sentence.
